Foreword

Education is the cornerstone of any nation's development, and Kebbi State is committed to ensuring that every child has access to quality basic education. The Baseline Mapping Exercise for Basic Education Teachers in Kebbi State is a critical step in addressing the challenges faced by the state's education sector, particularly in the areas of teacher recruitment, deployment, and retention. This report, prepared in line with the requirements of the Human Capital Opportunities for Prosperity and Equity: Governance (HOPE-GOV) programme, provides a comprehensive analysis of the current state of basic education in Kebbi State, identifying teachers' gaps and proposes actionable solutions to improve the adequacy and quality of basic education teachers in the State.

The findings of this exercise highlight the urgent need for strategic interventions to address the significant teacher shortages, particularly in rural areas, and to ensure that all students have access to qualified and motivated teachers. By implementing the recruitment/deployment plan and recommendations outlined in this report, Kebbi State can make significant strides toward achieving the goals of the Universal Basic Education (UBE) program and ensuring that every child has the opportunity to succeed.

I commend the efforts of the team from the Kebbi State Ministry of Basic and Secondary Education, the Kebbi State Universal Basic Education Board (KbSUBEB), and all stakeholders involved in this exercise. Their dedication and commitment to improving the state's education system are commendable. I hope that this report will serve as a valuable resource for policymakers, educators, and development partners as we work together to build a brighter future for the children of Kebbi State.

Dr. Halima Muhammad Bande.

Honorable Commissioner
Kebbi State Ministry of Basic and Secondary Education.

Acknowledgments

The successful completion of the Baseline Mapping Exercise for Basic Education Teachers in Kebbi State would not have been possible without the collective efforts and contributions of numerous individuals and organizations. We extend our heartfelt gratitude to all those who played a role in this important initiative.

First and foremost, we would like to thank His Excellency, Comrade Dr. Nasir Idris, the Executive Governor of Kebbi State, for his unwavering support and commitment to improving the State's education sector. His leadership and vision have been instrumental in driving this initiative forward.

We are deeply grateful to the leadership and staff of the Kebbi State Ministry of Basic and Secondary Education, the Kebbi State Universal Basic Education Board (KbSUBEB), and the Kebbi State Teachers Service Commission (KbTSC), particularly the Honorable Commissioner, Ministry for Basic and Secondary Education, Dr. Halimatu Muhammad Bande and the Executive Chairman Kebbi State Universal Basic Education Board Prof. Khalid Sulaiman (Dan Isan Jega, Wamban Gwandu), for their collaboration and dedication throughout the exercise. Their expertise and commitment to improving basic education in the state have been invaluable.

Special thanks go to the Baseline Exercise Technical Working Group, whose tireless efforts in data collection, analysis, and reporting have ensured the accuracy and reliability of the findings presented in this report. We also acknowledge the contributions of local government education authorities, school administrators, and teachers who provided critical data and insights during the exercise. We also thank the team at the Kebbi State Education Management Information System (EMIS) for providing the secondary data needed for this exercise.

Finally, we thank the communities and stakeholders across Kebbi State for their cooperation and support. Their involvement in this process underscores the importance of collective action in addressing the challenges facing our education system.

This report is a testament to the power of collaboration and shared commitment to improving education for all children in Kebbi State. We look forward to continuing this journey together, ensuring that every child has access to quality basic education.

Abubakar Magaji Nayilwa

Permanent Secretary

Kebbi State Ministry of Basic and Secondary Education

Executive Summary

The Baseline Mapping Exercise for Basic Education Teachers in Kebbi State was conducted in line with the requirements of the Human Capital Opportunities for Prosperity and Equity: Governance (HOPE-GOV) programme, a World Bank-supported initiative aimed at strengthening financial and human resource management in Nigeria's Basic Education and Primary Healthcare sectors. The exercise was designed to address the critical challenges of teacher recruitment, deployment, and retention in Kebbi State, to improve the quality of basic education for all children.

The exercise, apart from mapping the current gaps in basic education teachers, also estimated the expected retirements of basic education teachers over five years to ensure the recruitment and deployment plan projected captures both the current gap and the gap to be created by retirement between 2025 and 2029. The findings, recommendations, and conclusions from the exercise are summarized below.

Key Findings

1. **Teacher Shortages:** Kebbi State faces a significant shortage of basic education teachers, with a total of 21,180 teachers currently serving in primary and junior secondary schools. The state requires an additional 4,114 teachers over the next five years to meet the growing demand.
2. **Teacher Qualifications:** While most teachers hold NCE or Grade II qualifications, there is a need to diffuse the list with teachers with higher academic qualifications, particularly in core subjects such as mathematics, English, and Sciences.
3. **Gender Disparity:** There is a notable gender imbalance in the teaching workforce, with male teachers outnumbering female teachers by a ratio of more than 2:1. This disparity is most pronounced in rural areas, where female teachers are significantly underrepresented.

Recommendations

To address these challenges, the report proposes a comprehensive five-year recruitment and deployment plan, which includes:

- **Recruitment of 4,114 Teachers:** The state plans to recruit 3,024 primary school teachers and 1,091 junior secondary school teachers over the next five years, with priority for rural underserved areas in the 2025 recruitment.
- **Gender Equity:** Efforts will be made to recruit more female teachers to address the gender imbalance in the teaching workforce.
- **Improved Teacher Qualifications:** The state will open new recruitments to teachers with higher academic qualifications and provide ongoing professional development opportunities for existing teachers.

- **Equitable Deployment:** A strategic deployment plan will ensure that 67% of new teachers in 2025 are allocated to rural schools, addressing the urban-rural divide and improving educational outcomes in underserved areas.
- **Funding Strategy:** The state will adopt a diversified funding approach, with 60% of funding coming from government budgets, 25% from grants and donor funds, and 15% from private sector and community contributions.

Conclusion

The findings of this baseline mapping exercise highlight the urgent need for targeted interventions to address teacher shortages and disparities within Kebbi State's basic education system. By implementing the proposed recruitment and deployment plan, the state can make significant strides toward achieving the goals of the Universal Basic Education (UBE) programme, ensuring that every child has access to quality education.

This report serves as a comprehensive roadmap for education stakeholders, guiding their collaborative efforts to transform Kebbi State's education system. With sustained commitment and cooperation, Kebbi State can build a brighter future for its children and contribute to the broader development of the state.

1.0 INTRODUCTION

The baseline exercise mapping the number and duty stations of basic education teachers across Kebbi State and preparation of a multi-year costed recruitment and deployment plan to address staffing gaps identified is a requirement of Disbursement-Linked Result 5.1 of the Human Capital Opportunities for Prosperity and Equity: Governance (HOPE-GOV) programme; a World Bank-funded Programme for Results (PforR) initiative. HOPE-GOV aims to strengthen financial and human resource management in Nigeria's basic education and primary healthcare sectors, supporting government programs like Universal Basic Education (UBE) and Basic Healthcare Provision.

The development objective of the HOPE-GOV for Nigeria is to support the Federal Republic of Nigeria in strengthening financial and human resource management in basic education and primary healthcare sectors. The HOPE-GOV PforR will support government programs that focus on improving service delivery in the basic education and primary healthcare sectors. These government programs are:

- (i) the universal basic education (UBE) program established by the Universal Basic Education Act of 2004 (UBE Act), now being refocused through the new universal basic education roadmap (UBER), 2021 - 2030; and
- (ii) the basic healthcare provision program established by the National Health Act of 2014, now being implemented through the National Health Sector Renewal Investment Initiative (NHSRII), 2024 - 2028.

The program focuses on three result areas (RA):

- RA 1: increased availability and effectiveness of financing for basic education and primary healthcare service delivery;
- RA 2: enhanced transparency and accountability for basic education and primary healthcare financing; and
- RA 3: improved recruitment, deployment, and performance management of basic education teachers and primary healthcare workers by federal, state, and local governments.

This exercise is in fulfillment of indicator 5 (Increased number of teachers and health workers deployed), specifically DLR 5.1; baseline exercise mapping the number and duty stations of basic education teachers across Kebbi State and preparation of a multi-year costed recruitment and deployment plan to address staffing gaps.

1.1 Background

Located in northwestern Nigeria with Birnin Kebbi as its capital, Kebbi State was formed from part of Sokoto State in 1991. It has a total population of 3,238,628 (2006 National census) and comprises 21 Local Government Areas (LGAs) and 4 Emirates Councils. It is known for its

agricultural activities, particularly rice production, and its rich cultural heritage. The state is famous for the Argungu International Fishing and the Zuru Annual Uhola Cultural Festivals.¹

Kebbi State's education system, like that of Nigeria, follows a 6-3-3-4 structure (primary, junior secondary, senior secondary, and tertiary) with recent initiatives focusing on improving infrastructure, teacher welfare, and streamlining the Almajiri system. Kebbi state has a high percentage of out-of-school children, with 67.6% of children aged 6-15 not in school, making it one of the states with the highest rates in Nigeria.²

The Ministry of Basic and Secondary Education and the Kebbi State Universal Basic Education Board are responsible for basic education in the state. The state has a separate ministry for higher education.

As highlighted in the UBEC National Personnel Audit (NPA) 2022, Kebbi State has a total number of 380 public ECCDE/Pre-primary Schools, 1,967 public Primary Schools and 303 public Junior Secondary Schools. In addition, the State has a total number of 420 private ECCDE/Pre-primary schools, 2,774 private primary schools, and 105 private Junior Secondary Schools. The NPA report revealed that the State is faced with major challenges of low enrolment in Basic Education when compared with school-aged children. The major component of out-of-school children (OOSC) in the State are the Almajiris, girl-child, and nomadic children. The Almajiris, being the larger number of OOSC is because the state is bordered by two countries which are Niger and Benin Republic resulting in a high influx of Almajiris into the State, especially during the dry season. This situation poses a great challenge to the state in its effort to reduce the number of OOSCs and puts pressure on the existing teacher workforce.

1.2 Objectives of the Baseline Mapping Exercise

The objectives of the Baseline Mapping Exercise include:

- To identify and document the current number and location of basic education teachers across Kebbi State.
- To assess the existing gaps in teacher recruitment and deployment in the state.
- To develop a multi-year costed teacher recruitment and deployment plan to address the staffing gaps.
- To inform strategies for improving teacher performance management by the state and local governments.

1.3 Scope of the Baseline Mapping Exercise

The baseline mapping exercise encompasses all the basic education institutions within Kebbi State, including primary and junior secondary schools (nursery/pre-primary was not included in this report). It captured comprehensive data on the teaching workforce, identified gaps, and strategized effective teacher deployment and performance management. The scope of the

¹<https://www.kebbistate.gov.ng/#:~:text=Overview%20of%20Kebbi,provide%20important%20tourist%20attraction%20sites>.

² <https://businessday.ng/education/article/kebbi-sokoto-top-list-of-states-with-highest-number-of-out-of-school-children/>

exercise also includes distribution across LGAs, and urban and rural settings to ensure an equitable assessment and address the diverse educational needs across the state.

I.4 Methodology

I.4.1 Approach

Under the HOPE-GOV PforR, DLI 5 focuses on “Increased numbers of teachers and health workers deployed.” It has 2 DLRs. For DLR 5.1, states are expected to conduct a “Baseline exercise mapping the number and duty stations of basic education teachers across the state and a multi-year costed teacher recruitment and deployment plan to address the staffing gap completed and published by March 31, 2025,”

Kebbi State employed a mixed approach including extensive stakeholder mapping, sensitization, and engagements on the HOPE-GOV program, desk research, data collection, and analysis. The state conducted a baseline mapping exercise to collect and analyze data on:

- Names, types, and locations of basic education schools across the state.
- Total number of teachers.
- Gender of teachers.
- Academic qualification of teachers.
- Number of teachers expected to retire within the next 5 years.
- Student enrollment rate from 2022-2024.
- Number of teachers per subject taught in schools.

I.4.2 Data Collection and Analysis Method

A combination of primary and secondary data was collected for the exercise. Secondary data was collected from the database of Kebbi State’s Education Management Information System (EMIS) of the Ministry for Basic and Secondary Education and the State Universal Basic Education Board (KBSUBEB). The data was complemented with primary data collection using a structured data collection form. Other sources include the state’s payroll and personnel/HR records, state-owned websites, online reports, and publications.

The current pupil-teacher ratio was calculated, and the teachers gap was estimated by comparing the current pupil-teacher ratio in each school with the recommended benchmark in the National Policy on Education (1:25 for pre-primary schools, 1:35 for primary schools, and 1:40 for junior secondary schools). The current pupil-teacher ratio was calculated by dividing the total number of pupils by the total number of teachers at each level of education. The current ratio was subtracted from the recommended benchmark to arrive at the teacher's gap per school.

The teachers' gap per school was aggregated at the LGA level and summed up to arrive at the state-level teachers' gap.

I.4.3 Methodological Limitations

Limitations include difficulty obtaining credible data for student enrolment rates for the past three (3) to five (5) years to understudy the trend in enrollment and use the data to accurately

estimate future teachers' needs when more students are enrolled in the basic education system. Also, due to the large volume and data privacy reasons (contains personal identifiable information), details such as names, qualifications, experience, position/functions, duty stations and dates of commencement for each teachers are not explicitly listed in the document. However, this data is available on Kebbi State's Education Management Information System (EMIS).

2.0 SITUATIONAL ANALYSIS

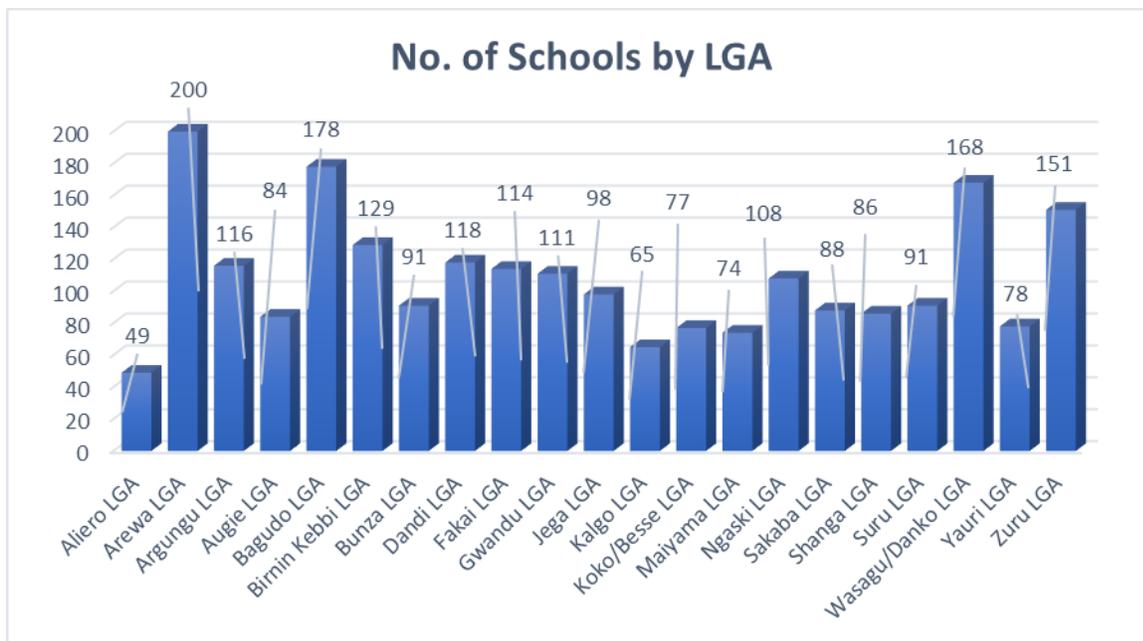

2.1 Overview of Kebbi State's Basic Education System and Human Resources

2.1.1 Number of Government-owned basic education facilities in the State

The educational infrastructure in Kebbi State is extensive, encompassing a total of 2,274 schools across the state. These institutions are classified into 1,784 primary schools and 490 junior secondary schools. As depicted in Figure 1, Arewa Local Government Area (LGA) exhibits the highest number of schools, totaling 200, followed by Bagudo with 178, and Wasagu/Danko with 168. Conversely, Aliero LGA has the fewest schools, amounting to 49, with Kalgo and Maiyama following closely at 65 and 74, respectively. On average, each LGA hosts approximately 108 schools, reflecting a significant effort to ensure equitable access to education throughout the state. This distribution demonstrates a committed endeavor to provide educational facilities to students across various regions, which is imperative for sustaining and enhancing the overall educational standards.

This chart below underscores the disparate distribution of educational facilities across the different LGAs, highlighting areas where additional resources may be necessary to balance and address disparities.

Figure 1: Distribution of government-owned basic education school

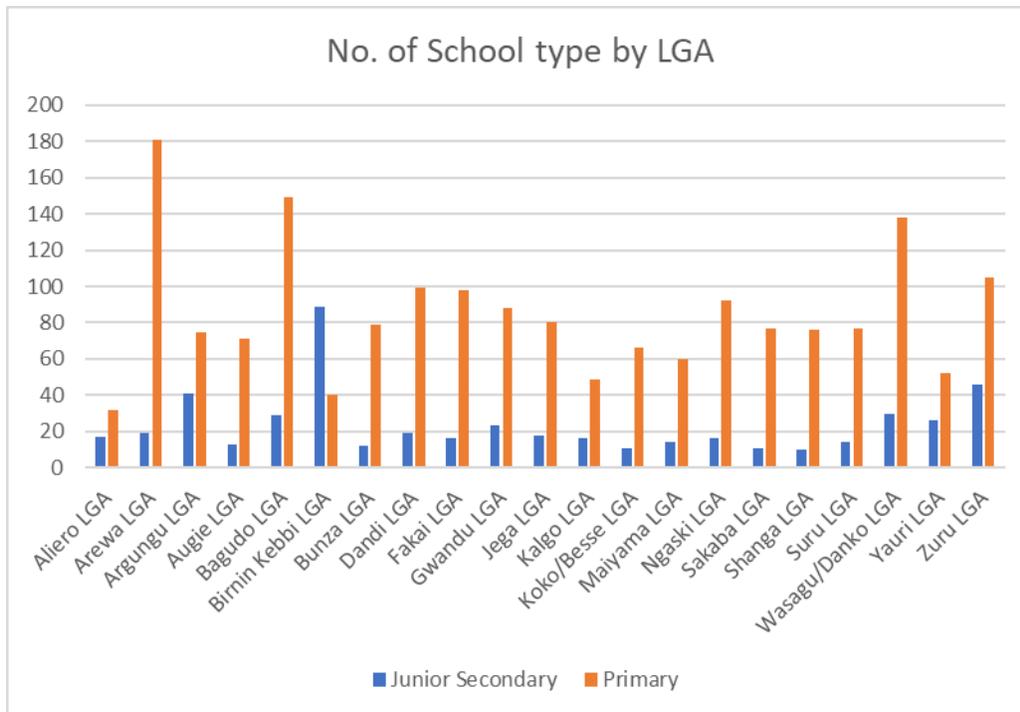

Source: Kebbi State Education Management Information System (EMIS) and Kebbi State Annual School Census 2022-2023.

2.1.2 Basic Education Facility Density in Kebbi State

The chart provides a detailed overview of the distribution of basic education facilities across the LGAs in Kebbi State. The distribution of primary education facilities across the state shows marked variability among the LGAs as shown in Figure 2 below. Arewa LGA stands out with the highest number of primary schools, totaling 181. This is followed by Bagudo and Wasagu/Danko with 149 and 138 primary schools respectively. These LGAs represent areas with significant infrastructure dedicated to primary education, likely reflecting a higher population density or a strategic focus on education access.

In contrast, LGAs such as Aliero, Birnin Kebbi, and Kalgo have the fewest primary schools, with counts of 32, 40, and 49 respectively. This suggests potential challenges in these regions to meet the educational demands of the population. The lower numbers might indicate a need for increased investment in educational infrastructure to ensure equitable access to primary education.

Figure 2: Basic Education Facility Density in Kebbi State

Source: Kebbi State Education Management Information System (EMIS) and Kebbi State Annual School Census 2022-2023.

The distribution of junior secondary schools also reveals important disparities. Birnin Kebbi LGA leads with 89 junior secondary schools, indicating a robust infrastructure for secondary education. Zuru and Argungu follow with 46 and 41 junior secondary schools respectively. This distribution highlights certain LGAs as focal points for secondary education, which may correlate with higher student enrollment numbers in these areas.

On the other end of the spectrum, LGAs such as Shanga, Koko/Besse, Sakaba, Bunza, and Augie have significantly fewer junior secondary schools, with counts ranging from 10 to 13. These figures suggest a need for enhanced support and development of secondary education facilities in these regions to balance the educational opportunities across the state.

The disparities in the distribution of primary and junior secondary schools necessitate a strategic approach to resource allocation. LGAs with fewer educational facilities might benefit from targeted investments to build new schools and refurbish existing ones. Additionally, ensuring that these regions receive adequate teaching staff and educational materials will be crucial to improving the overall educational standards.

2.1.3 Students Enrollment in Basic Education Facilities in Kebbi State

As shown in Table 1 below, Kebbi State boasts a total enrollment of 1,182,018 students in its pre-primary, primary, and junior secondary schools across 21 LGAs. Among these, the highest combined student enrollment is found in Birnin Kebbi LGA with 107,384 students, followed by

Zuru and Argungu with 99,655 and 98,624 students, respectively. On the other hand, Kalgo LGA has the lowest enrollment at 24,541, with Sakaba and Augie close behind with 27,340 and 29,727 students, respectively.

Table 1: Student Enrollment in Basic Education Facilities in Kebbi State

LGAs	Number of Students
Aliero Local Government Area	31,655
Junior Secondary	12,492
Pre-Primary/Primary	19,163
Arewa Local Government Area	82,490
Junior Secondary	17,201
Pre-Primary/Primary	65,289
Argungu Local Government Area	98,624
Junior Secondary	44,229
Pre-Primary/Primary	54,395
Augie Local Government Area	29,727
Junior Secondary	4,309
Pre-Primary/Primary	25,418
Bagudo Local Government Area	64,954

Junior Secondary	31,112
Pre-Primary/Primary	68,543
Grand Total	1,182,018

Source: Kebbi State Education Management Information System (EMIS) and Kebbi State Annual School Census 2022-2023.

The total number of primary school students amounts to 850,083, while junior secondary school enrollments stand at 331,935. The LGAs with the highest primary school enrollments are Zuru (68,543 students), Arewa (65,289 students), and Argungu (54,395 students). Conversely, the lowest primary school enrollments are found in Kalgo (16,950 students), Aliero (19,163 students), and Sakaba (22,858 students).

For junior secondary schools, Birnin Kebbi leads with 67,894 students, followed by Argungu (44,229 students) and Zuru (31,112 students). The lowest enrollments are in Augie (4,309 students), Sakaba (4,482 students), and Fakai (5,682 students). This data and analysis highlight the need for targeted educational development in regions with lower student numbers to ensure equitable access to education throughout Kebbi State.

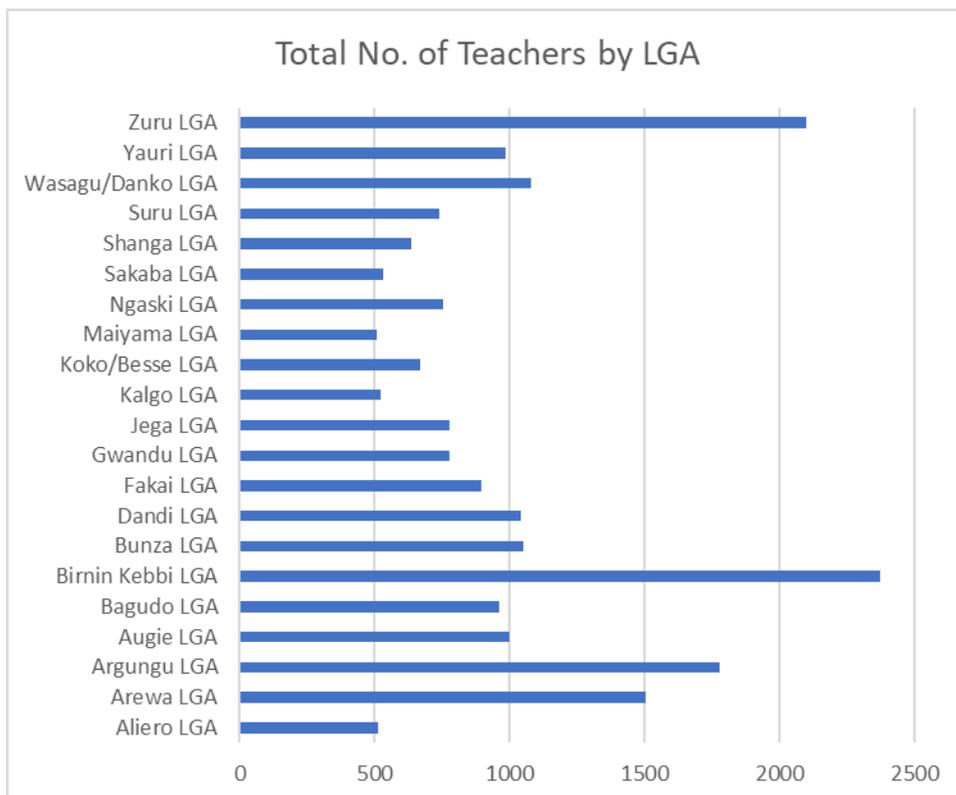

2.1.4 Current Basic Education Workforce in Kebbi State and their Locations

2.1.4.1 Total Basic Education Workforce in Kebbi State by Location

Kebbi's current total teacher workforce for basic education is 21,180, comprising 14,518 male teachers and 6,662 female teachers. This distribution reflects a significant gender disparity which may impact the dynamics within educational institutions. Birnin Kebbi LGA leads with the highest number of teachers at 2,369, followed by Zuru with 2,096 and Argungu with 1,778. These figures suggest a concentration of educational resources in more populated and urban areas, potentially leading to disparities in educational quality across different regions. The spread of the workforce by LGA is shown in Figure 3 below.

Due to the large volume and data privacy reasons (contains personal identifiable information), details such as names, qualifications, experience, position/functions, duty stations and dates of commencement for each teacher are not explicitly listed in the document. However, this data is available on Kebbi State’s Education Management Information System (EMIS).

Figure 3: Total Basic Education Workforce (Teachers) in Kebbi State by Location

Source: Kebbi State Education Management Information System (EMIS) and Kebbi State Annual School Census 2022-2023.

Conversely, the LGAs with the fewest teachers are Maiyama with 510, Aliero with 512, and Kalgo with 522. This paucity of educators in certain regions indicates a pressing need for strategic recruitment and deployment of teaching staff to ensure all students receive adequate educational support.

Furthermore, an analysis of the urban-rural distribution of teachers reveals that 8,674 educators are employed in 649 urban schools, whereas 12,506 teachers work across 1,625 rural schools. While the number of rural teachers is higher, the larger number of schools in rural areas suggests a strain on human resources at the rural level and the necessity for policies aimed at balancing the teacher-pupil ratio more effectively in these regions.

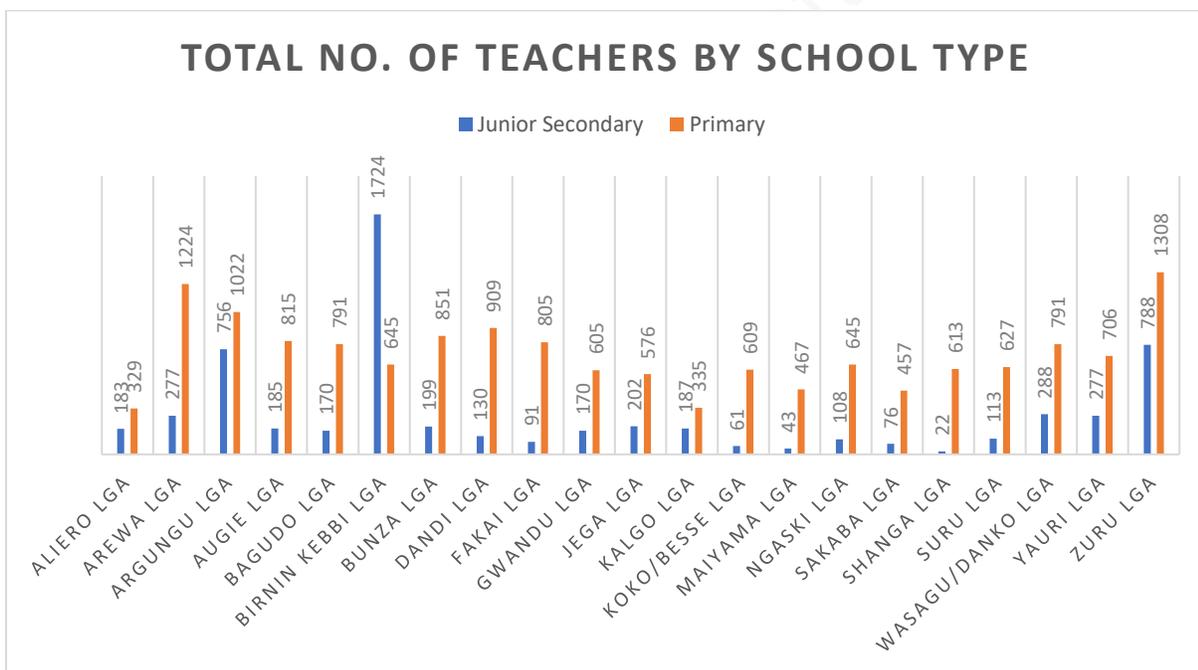

2.1.4.2 Distribution of Basic Education Workforce by School Type

Out of its 21,180 basic education teachers, Kebbi State has allocated 15,130 teachers to primary schools and 6,050 to junior secondary schools. This distribution highlights a strategic

focus on foundational education. As shown in Figure 4, the LGAs with the highest number of primary school teachers are Zuru with 1,308, Arewa with 1,224, and Argungu with 1,022, reflecting a prioritization of regions with higher student enrollments. Conversely, Aliero with 329 teachers, Kalgo with 335, and Sakaba with 457 have the least number of primary school educators, indicating a potential imbalance that may affect the quality of education in these areas.

For junior secondary schools, Birnin Kebbi leads with 1,724 teachers, followed by Zuru and Argungu with 788 and 756 teachers, respectively. This concentration of educators in more urbanized LGAs suggests a focus on maintaining educational standards where student numbers are high. In contrast, Shanga, Maiyama, and Koko/Besse with 22, 43, and 61 teachers, respectively, indicate a significant shortfall in these regions, underscoring the need for targeted recruitment and resource allocation to enhance educational support for junior secondary students in these areas.

Figure 4: Distribution of Basic Education Workforce by School Type

Source: Kebbi State Education Management Information System (EMIS) and Kebbi State Annual School Census 2022-2023.

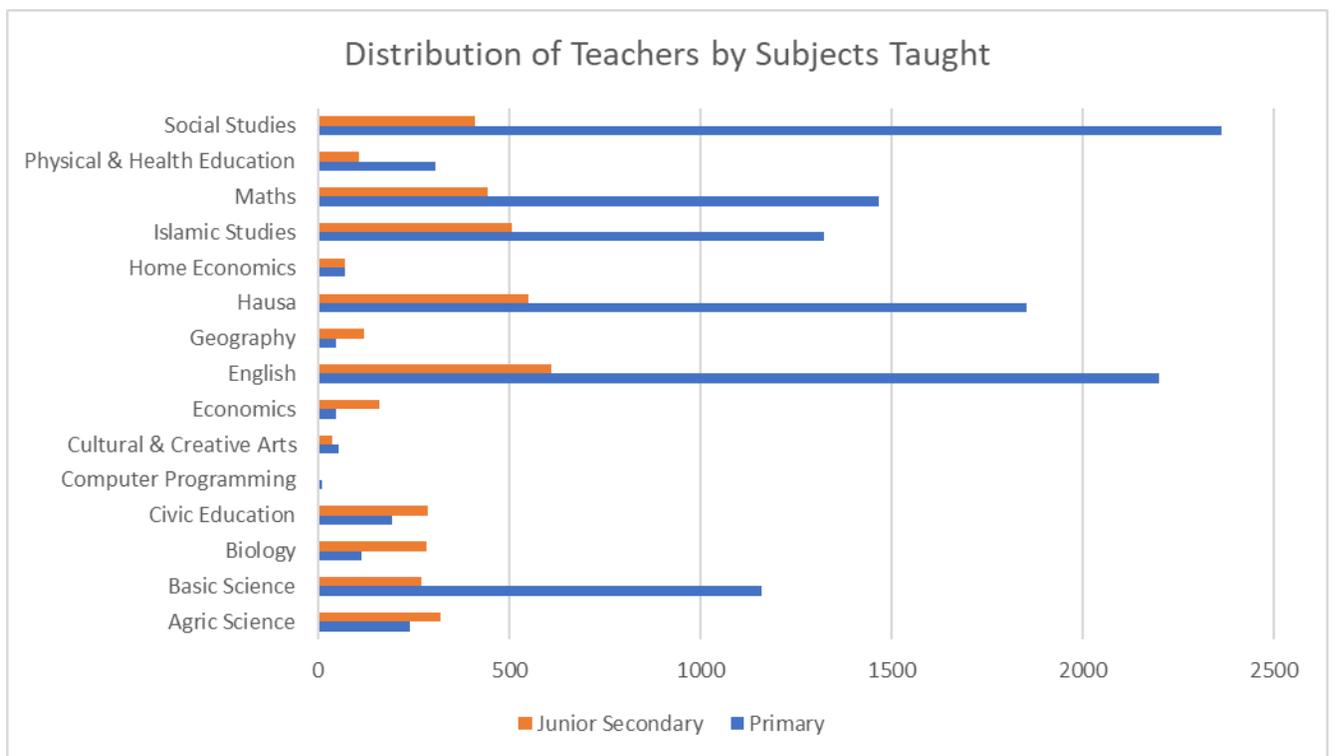

2.1.4.3 Distribution of Basic Education Workforce by Subjects Taught

In terms of subject areas, Kebbi State has a notable distribution of teachers across various subjects as depicted in Figure 5. There are 1,912 teachers dedicated to mathematics instruction and 2,813 teachers for English, highlighting the emphasis on core subjects in basic education. Other subjects with significant numbers of teachers include Social Studies with 2,774, Hausa with 2,406, and Arabic with 1,952. Additionally, there are 561 teachers for Agricultural Science

and 28 for Animal Husbandry, demonstrating a focus on diverse academic and vocational disciplines. Computer Science and Computer Programming are taught by 420 and 14 teachers, respectively, indicating a growing integration of technology-related subjects in the curriculum.

The distribution of teachers by subjects taught highlights the need to recruit and re-assign existing teachers to subjects that are considered more critical by providing students with foundational literacy and numeracy skills, appreciation of science and technology, and practical skills for innovation and development.

Figure 5: Distribution of Basic Education Workforce (Teachers) by Subjects Taught

Source: Kebbi State Education Management Information System (EMIS) and Kebbi State Annual School Census 2022-2023.

2.1.4.4 Teacher-Pupil Ratios in Kebbi State

The average Gross Pupil-Teacher ratio in Kebbi State is 1:142 for primary school and 1:127 for Junior Secondary schools against a recommendations/benchmark of 1:25 for pre-primary, 1:35 for primary, and 1:40 for secondary schools according to the National Policy on Education. Therefore, Kebbi significantly exceeds the benchmark in both its primary and junior secondary schools signifying class overcrowding as defined by the National Center for Education Statistics (NCES). See Annex 4 for a detailed breakdown of the current Teacher-pupil ratio per school.

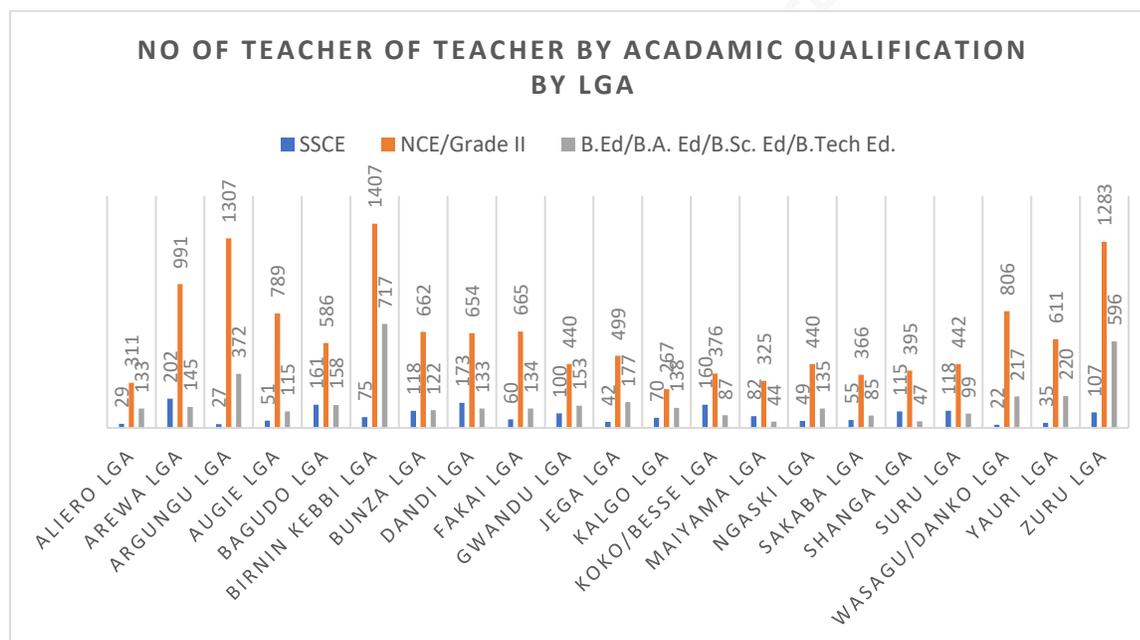

2.1.4.5 Distribution of Teacher Academic Qualifications in Kebbi State

Out of the 21,180 basic education teachers working in Kebbi State, 1,851 hold SSCE/WASC academic qualifications, 13,622 have NCE or Grade II qualifications, while 4,027 possess a degree (B.Ed/B.A. Ed/B.Sc. Ed/B.Tech Ed.) or higher. This demonstrates that the NCE or Grade II qualification is the most prevalent among teachers in the state.

As shown in Figure 6, Birnin Kebbi is the LGA with the highest number of teachers holding both degrees (717) and NCE/Grade II qualifications (1,407). Zuru LGA has the second-highest number of teachers with degrees (596) and the third-highest for NCE/Grade II (1,283).

The LGAs with the fewest number of teachers holding degrees are Maiyama with 44, Shanga with 47, and Sakaba with 85. Those with the fewest NCE/Grade II holders are Kalgo with 267, Aliero with 311, and Maiyama with 325. These disparities highlight areas that may benefit from targeted educational interventions and professional development opportunities to ensure a more balanced distribution of qualified teachers across the state.

Figure 6: Distribution of Teachers by Academic Qualifications in Kebbi State

Source: Kebbi State Education Management Information System (EMIS) and Kebbi State Annual School Census 2022-2023.

2.1.4.6 Distribution of Teachers by Gender in Kebbi State

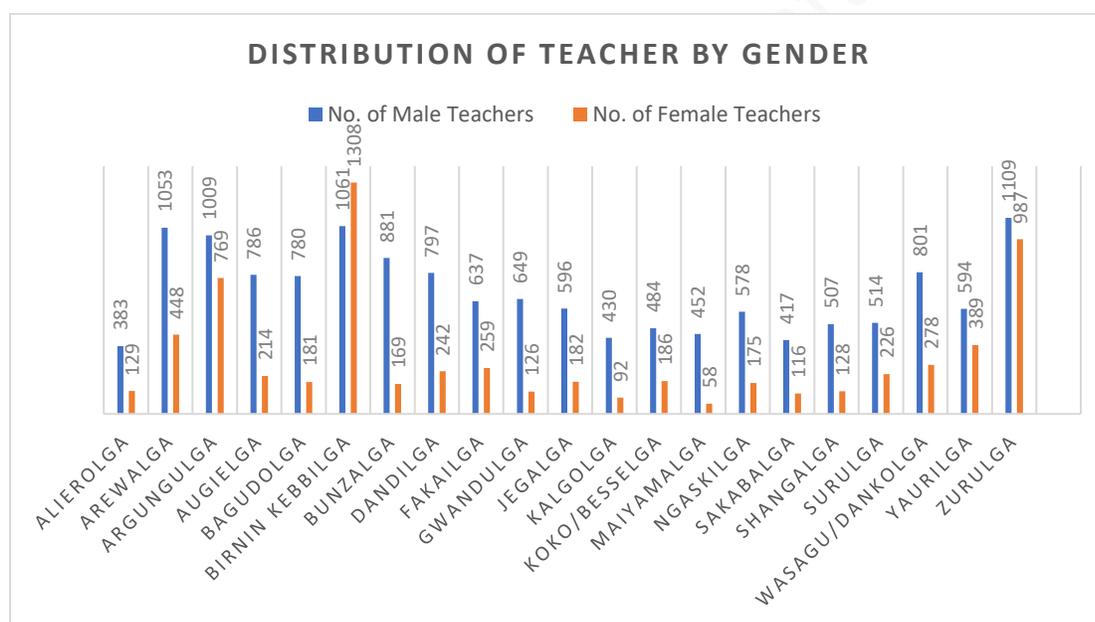

In Kebbi's basic education schools, there are 14,518 male teachers and 6,662 female teachers, revealing a significant gender imbalance. Males are consistently the majority in the teaching workforce, except in Birnin Kebbi LGA, where female teachers (1,308) exceed male teachers (1,061). As depicted in Figure 7, Bunza LGA has the largest disparity, with 881 males and just 169 females—a difference of 712 teachers. Arewa LGA follows closely, with 1,053 males and 448 females, showing a difference of 605 teachers. Bagudo LGA also displays a substantial gap, with 780 males and 181 females, differing by 599 teachers.

Conversely, Zuru LGA shows the smallest gender gap, with 1,109 males and 987 females, a difference of 122 teachers. Yauri LGA has 594 males and 389 females, a difference of 205 teachers. Argungu LGA exhibits a difference of 240 teachers, with 1,009 males and 769 females.

This gender disparity underscores the necessity of promoting gender equality in the teaching workforce. Initiatives such as implementing supportive policies, fostering an inclusive environment, and encouraging female recruitment can help address these imbalances and improve educational outcomes for all students in Kebbi State.

Gender dynamics are integral to the social context of Kebbi State, reflecting traditional roles and expectations. While strides have been made in recent years to promote gender equality in education, challenges persist. The social context recognizes the importance of addressing these challenges, ensuring that both boys and girls have equal access to educational opportunities and that more female teachers are employed in schools across the state. Strategies include fostering a supportive environment that challenges gender stereotypes, encouraging female recruitment, and implementing policies that promote gender-sensitive teaching practices.

Figure 7: Distribution of Teachers by Gender in Kebbi State

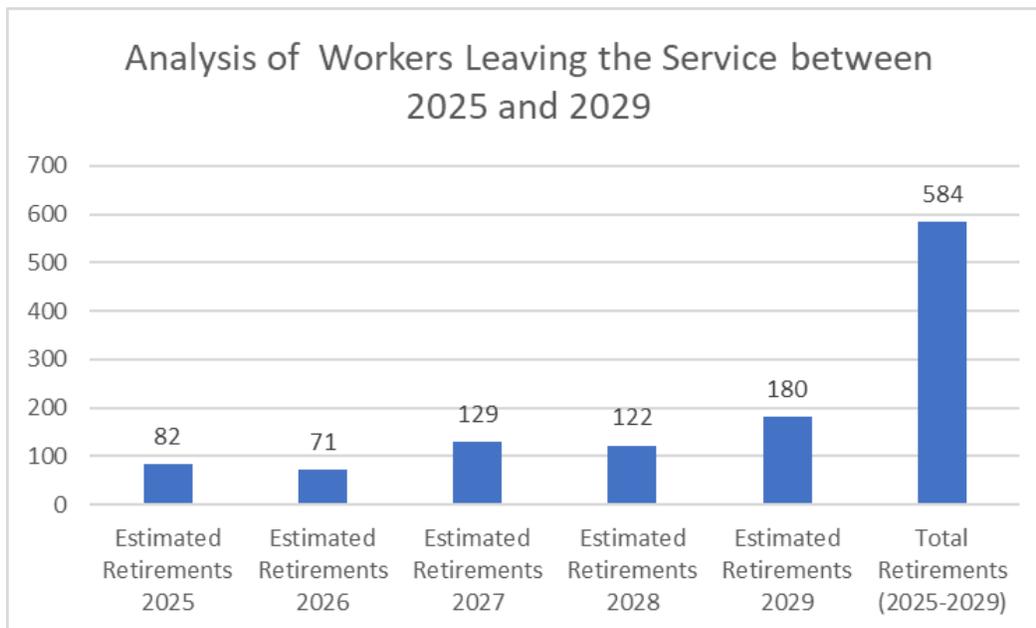

Source: Kebbi State Education Management Information System (EMIS) and Kebbi State Annual School Census 2022-2023.

2.1.4.7 Analysis of Workers Leaving the Service Between 2025 and 2029

As workers (teachers) in basic education reach their retirement age, those affected will leave the service in varying numbers between 2025 and 2029 covered in this report. The retirements of these experienced teachers create a vacuum and underscore the need for regular recruitment of younger teachers who can be trained and mentored by more experienced hands before their exit from service.

Based on analysis of the data from the Kebbi State Education Management Information System (EMIS), a total of 584 basic education teachers are expected to retire between 2025 and 2029. This represents 2.76% percent of the total current workforce, indicating a relatively young basic education workforce which is an advantage to the state. While this proportion may seem small, failure to recruit and replace these teachers could have far-reaching and negative consequences on basic education, especially in the affected schools. The highest number of expected retirements is 180 in 2029 while the least is 71 in 2026. Overall, this demonstrates the need for Kebbi State to ensure the recruitment and deployment of new teachers to avoid widening the existing teachers' gap and putting additional pressure on the remaining teachers as the student population is also anticipated to grow year-on-year.

Figure 8: Analysis of Workers Leaving the Service between 2025 and 2029 in Kebbi State

Source: Kebbi State Education Management Information System (EMIS) and Kebbi State Annual School Census 2022-2023.

2.1.4.8 Student Enrollment/Population Projection

According to the National Bureau of Statistics, Kebbi's population of 3,256,541 in the 2006 census is projected to have grown to 4,440,050 by 2016.³ Out of this, up to 42% are expected to be between the ages of 0-14, requiring basic education. Other forecasts show that Kebbi's population in 2022 has grown to 5,563,900.⁴ These growths are also reflected in the year-on-year increase in basic education student enrollment in 2022-2024 as shown in Table 2a below. Thus, as the state's population grows, student enrollment for basic education is equally expected to grow at an average of 713,299 students as much as an average of 709,570 students are also graduating from BED schools annually. Therefore, government, planners, policymakers,

³ <https://www.nigerianstat.gov.ng/download/474>

⁴ https://www.citypopulation.de/en/nigeria/admin/NGA022__kebbi/

and other actors in basic education must ensure that they are constantly planning and budgeting to accommodate increased student enrollment, especially in basic education.

Based on the average student enrollment and exit data, the population of basic education students in the State is estimated to grow annually by an average of 3,729 students. This results in the student population projection presented in Table 2b below.

Table 2a: Basic Education Student Enrollment and Population Projection

Student Enrollment and Exit from BED	2022	2023	2024	3-Year Average
Student Enrollment in BED	645,995	711,371	782,530	713,299
Student Graduation/Exit from BED	637,675	715,814	775,221	709,570
Average Annual Addition to Student Population	8,320	-4,443	7,309	3,729

Source: Analysis based on data from Kebbi State Education Management Information System (EMIS), Kebbi State Annual School Census 2022-2023 and Baseline Survey.

As outlined in Table 2b, the population of basic education students in the state is projected to increase from the current 1,182,018 students to 1,185,747 students by the end of 2025, grow to 1,193,204 students in 2027, and peak at 1,200,661 students in 2029.

Table 2b: Projection of Student Population (2025-2029)

Student Population Projection	Number
Current Student Population	1,182,018
Projected Student Population 2025	1,185,747
Projected Student Population 2026	1,189,475
Projected Student Population 2027	1,193,204
Projected Student Population 2028	1,196,933
Projected Student Population 2029	1,200,661

Source: Analysis based on data from Kebbi State Education Management Information System (EMIS), Kebbi State Annual School Census 2022-2023 and Baseline Survey.

2.1.4.9 Forecasting - Assessment of Future Workforce Requirements

As discussed in 2.1.4.8 above, as the student population in Kebbi State grows, the workforce (number of teachers) is equally expected to grow if we are to achieve and maintain adherence to benchmarks such as the maximum permissible pupil-to-teacher ratios, urban vs rural ratio targets, gender distribution, and special needs teaching requirements.

Table 3 in section 2.2.1 analyses the teachers gap in each LGA from 2025 to 2029, while the summary by school type is shown in table 4. The greatest teacher gaps are in Argungu, Zuru

and Birnin Kebbi LGAs with 534, 501 and 490, respectively. The least gaps are in Augie, Kalgo and Fakai with 16, 17 and 25, respectively.

Figure 8 in section 2.1.4.7 above analyzes the number of workers leaving service between 2025 and 2029. In Kebbi State, total of 584 basic education teachers are expected to retire within this frame. The highest number of expected retirements is 180 in 2029 while the least is 71 in 2026.

Currently, the state has 14,518 male teachers and 6,662 female teachers. Thus, to reduce this wide gender gap, there is need to prioritize recruitment and deployment of female teachers. It will also need to recruit additional teachers for special needs to tackle the current 1:125 teacher to pupil ratio in primary schools for students with special needs (see table 6 in section 2.3.2 below).

Therefore, this data and information are used to design the teacher recruitment and deployment plan shown in section 3 below. The plan is also carefully designed to ensure that Kebbi achieves and sustains adherence to benchmarks such as the maximum permissible pupil-to-teacher ratios, urban vs rural ratio targets, gender distribution, and special needs teaching requirements, ensuring quality teaching and learning in all schools in the state. Based on the number of teachers estimated to retire from service and the projected student population discussed above, as teachers retire, the student population in basic education schools is expected to grow. In other words, the rate at which the number of students in basic education schools grows necessitates the need for the government to ensure timely recruitment and deployment of teachers to not only replace those who will retire but to cater to the growing number of students in the state.

2.2 Teachers Gap Analysis and Findings

2.2.1 Total Basic Education Teachers Gap by Location in Kebbi State

The various LGAs in Kebbi State exhibit varying degrees of teacher shortages. Table 3 below provides a detailed analysis of the current deficit in each LGA, estimated gaps from 2025 to 2029, and the total teachers' gap as teachers retire, and new students enroll.

The analysis revealed an existing gap of 3,269 teachers estimated to increase to 4,114 by 2029.

Table 3: Total Basic Education Teachers Gap by Location in Kebbi State

LGAs	Current Teachers Gap	Estimated 2025 Teachers Gap	Estimated 2026 Teachers Gap	Estimated 2027 Teachers Gap	Estimated 2028 Teachers Gap	Estimated 2029 Teachers Gap	Total Teachers Gap (2025-2029)

2.2.2 Summary of Basic Education Teachers Gap by School Type

Across primary and junior secondary schools, the teacher gaps vary significantly by LGAs. For primary schools, Zuru has the highest gap with 359 teachers, followed by Birnin Kebbi with 335 teachers and Jega with 331 teachers. The smallest gaps are found in Augie with 4 4-teacher gaps, Kalgo with 11 teacher gaps, and Bagudo with 6 teacher gaps.

In junior secondary schools, the largest gap is in Argungu with 227 teachers, followed by Birnin Kebbi with 155 gaps, and Jega with 151 teachers' gaps. The LGAs with the smallest gaps are

Shanga and Maiyama (2), Gwandu (3), and Suru with 4 junior secondary teachers' gaps. These gaps are presented in Table 3 below.

Table 4: Summary of Basic Education Teachers Gap by School Type

LGAs	Junior Secondary Teachers Gap (2025-2029)	Pre-Primary/Primary Teachers Gap (2025-2029)	Total Teachers Gap (2025-2029)

2.2.3 Current Staffing Position and Gaps, Required Skills, and Teachers in Each School

Annex 5 and 6 below show the current staff position in each school, i.e., name of school, number of teachers, academic qualifications of teachers, subject taught and subjects without assigned teachers i.e., gaps.

The situation varies by school and LGAs. While some schools have teachers assigned to core subjects such as Mathematics, English and Basic Science, some schools do not. While some schools have a spread of teachers across various subjects, some have concentration of teachers in certain subjects and shortages in others. For instance, across all schools, there are 1,467 Mathematics teachers, 2,201 for English, 510 for Biology, 801 for Agric Science and 2,589 for Basic Science.

This means that under the current arrangement, the ratio of total students to total Mathematics teachers is 1:736, and 1:490 for English teachers. This depicts an acute shortage of Mathematics and English teachers in many schools, while the existing ones are overworked and overstretched.

In terms of academic qualifications, NCE/Grade II is the most prevalent academic qualification and is held by 64.3% of teachers in the state (see figure 6 above). Teachers with degrees or higher constitute 19% while the balance of 16.7% are SSCE holders.

Therefore, this information is used in the recruitment and deployment plan in section 3.0 below to determine appropriate recruitment and deployment of teachers to address the gaps in terms of number of teachers, academic qualifications, and subject areas. Thus, table 10 recommends deploying 413 additional teachers to teach English, 412 for Mathematics, 397 for Biology, 361 for Agric Science and 156 for Basic Science to address the gaps identified above.

2.2.4 Identifying Skills and Number of Teachers Needed

For each school, the skills and teacher gaps are identified using data obtain from the state's EMIS and based on findings discussed above. Kindly refer to Annex 5 and 6 to see current number of teachers per school, their academic qualifications, subjects with teachers assigned and those without assigned teachers (gaps).

Based on the analysis, recommendations are made in section 3 below on the number and distribution of teachers to be recruited and deployed for pre-primary and primary vs junior secondary schools, rural vs urban schools, by subject area, and for each LGA, based on the needs of individual schools.

In this way, teachers that are recruited are not arbitrarily or randomly deployed. Rather, they are efficiently and effectively deployed to the specific schools where their skills are required, to teach subjects where teachers are shortages.

Table 9 in section 3.2.2 below shows the teacher gaps per LGA, derived from teachers gaps in individual schools in each LGA. Based on these gaps, recommendations are made to recruit and deploy additional teachers between 2025 and 2029 to totally close these gaps and ensure that schools meet benchmarks such as the teacher-to-pupil ratio that enhance teaching and learning.

2.3 Institutional Structure for Basic Education Human Resource Management in Kebbi State.

Basic Education in Kebbi State is managed by various stakeholders at different levels as presented in Table 4. The development and implementation of the state's Basic Education Policy is informed by the state and local government needs. The responsibility for human resource management in basic education cuts across various MDAs and stakeholders. The table below defines the roles and responsibilities of the various stakeholders.

Table 5: Institutional Structure for Basic Education Human Resource Management in Kebbi State

MDA/ STAKEHOLDER	MANDATE	FUNDING SOURCES
Ministry for Basic and Secondary Education	<ul style="list-style-type: none"> i. Education policy development, standards setting, monitoring, and implementation ii. Source: Kebbi State Medium Term Basic Education Strategic Plan (MTBESP) 2024-2027

To ensure effective basic education human resource management in the state, education managers are subjected to a series of training and re-training regularly, aimed at enhancing their capacity and capability to deliver.

Also, to ensure effective data management in the state, it has introduced the Teacher Management Information System (TMIS) at both state and local government levels. Officials of the education/teacher MIS units at both the MOE, SUBEB, and local government levels have

been trained in Microsoft Office (Excel, Word, PowerPoint), teacher management verification, cleaning, and analysis of collected data, and other areas.

There are Quality Assurance/School Support officers at both SUBEB and local government levels. Thus, quality assurance and supervision have been entrenched into the school system as part of efforts to support, mentor, and guide teachers for improved teaching and learning.

Kebbi State understands the importance of community and CSO participation in education management and school governance. Thus, it has reactivated its SBMCs/CBMCs and provides training and retraining on their roles and responsibilities as well as resource mobilization for improved school safety and governance. This is yielding positive results, especially on independent monitoring reports and mentoring of our community structure.

2.3.1 Permissible Teacher-to-Pupil Ratio in Kebbi State

In Nigeria, the National Policy on Education recommends a teacher-to-pupil ratio of 1:35 for primary schools and 1:40 for junior secondary schools to ensure effective teaching and learning.⁵ The policy emphasizes the importance of basic education and the need for a manageable teacher-to-pupil ratio to ensure qualitative education and meaningful learning.

Despite the recommendations, many primary and junior secondary school classrooms in Kebbi State are overcrowded, highlighting challenges in implementing the policy. As shown in the sections above, the average teacher-pupil ratio in Kebbi State is 1:142 for primary schools and 1:127 for Junior Secondary schools. Thus, significant efforts are required to bring these ratios within the benchmarks for schools in both urban and rural areas.

The State is working towards meeting the National Policy on Education benchmark in the short run, however, in the short run, the State Government is targeting a maximum average Teacher-to-Pupil ratio of 1:70 for primary schools and 1:60 for junior secondary schools in both urban and rural areas pending the achievement of the National Policy on Education recommended ratio.

2.3.2 Special Education in Kebbi State

Kebbi State has made some provisions to cater to its non-conventional students. This includes Special Needs Schools, Nomadic Schools, Migrant Fishermen/Farmers Schools, Islamiyya Schools, and Tsangaya/Almajiri Schools. These are considered special education/curriculum schools. These schools cater to students with learning disabilities and provide remedial education for students with or without special needs. Thus, in this way, the state is providing reasonable accommodation to address individual differences, disabilities, and special needs of children in Kebbi.

⁵ <https://education.gov.ng/national-policy-on-education/>

The levels of basic education that are covered include Early Childhood Care Development and Education (ECCDE), primary and junior secondary schools, for male and female students in urban and rural areas. Thus, through these special education programmes, the state is ensuring inclusion and expanding access to basic education to children across the state irrespective of their peculiar situations and circumstances.

Table 6: Special Education Programmes for Basic Education in Kebbi State

LEVEL	PROGRAMME	NO OF SCHOOLS	ENROLMENT			TEACHING STAFF			PTR
			M	F	T	M	F	T	
ECCDE	Special needs	5	112	67	179	14	24	38	1:5

2.4 Challenges of Basic Education Workers Recruitment, Deployment and Retention in Kebbi State.

Although Kebbi State is intensifying efforts to ensure full implementation of its Teacher Recruitment and Redeployment (TRD) Policy, the teaching workforce in its basic education system faces significant challenges.

Major challenges confronting teachers' recruitment, deployment, and retention include:

- Inadequate financing and resourcing of the basic education sub-sector for the recruitment, deployment, and retention of teachers.

- Inadequate teacher recruitment and deployment, especially in rural areas. Due to more favorable conditions in urban areas, more teachers prefer to work in schools situated in urban areas where they have access to modern facilities.
- Lack of attractive salaries and other packages to encourage more young people to join the teaching profession.
- Insufficient teaching/learning materials to be used by teachers in schools such as textbooks, blackboards, computers, tablets, etc.
- Inadequate infrastructural facilities including potable water, electricity, and water, sanitation, and hygiene (WASH) facilities in schools.
- Inadequate monitoring and mentoring by relevant MDAs and administrators.
- Low community participation to complement government efforts in monitoring and inspection of schools, and demand for improved teacher recruitment, deployment, and training.

These challenges may have contributed to and amounted to poor educational outcomes at the basic education level resulting in many pupils/students leaving primary and junior secondary schools without the requisite skills and competencies for them to be self-reliant.

3.0 RECRUITMENT/DEPLOYMENT PLAN AND COSTING

3.1 Recruitment Plan

3.1.1 Basic Education Teachers Recruitment by School Level (5-year Projection)

To address the challenges affecting the education sector, Kebbi State has developed a comprehensive recruitment and deployment plan for basic education teachers over the next five years (2025-2029). The plan aims to recruit a total of 4114 additional teachers, comprising 3024 pre-primary/primary level teachers and 1091 junior secondary school teachers.

As presented in Table 5, the plan is to recruit 4,114 teachers over five (5) years; 2057 teachers in 2025, 823 teachers in 2026, and 411 teachers each in 2027, 2028, and 2029. The recruitment plan focuses on recruiting more teachers in 2025 and 2026 to quickly reduce the strain on the existing teachers and improve teachers' service delivery in the short run.

Table 7: Basic Education Teachers Recruitment by School Level (5-year Projection)

Teachers Recruitment by School Level	Total	2025	2026	2027	2028	2029
Pre-Primary/Primary	3,024	1,512	605	302	302	302
Junior Secondary	1,091	545	218	109	109	109
Total	4,114	2,057	823	411	411	411

Source: Baseline Survey Analysis from Data Collected

This strategic approach not only aims to close the current and projected teacher gap but also to enhance teacher distribution, particularly in rural areas where shortages are more acute. The

implementation of this plan will help bridge learning disparities between urban and rural schools and encourage greater community support for basic education.

By prioritizing the deployment of 67% of new teachers to underserved rural areas in 2025, the plan emphasizes equitable access to quality education. This immediate focus on rural areas will help improve educational outcomes, fostering primary to secondary-transitions and enhancing the overall quality of learning in these communities. Additionally, the recruitment process will emphasize inclusion by prioritizing the hiring of women, persons with disabilities, minorities, and other disadvantaged groups.

Such initiatives are expected to result in better educational outcomes at the basic education level, ensuring that students acquire the requisite skills and competencies to be self-reliant and successful in their future endeavors.

3.1.2 Recruitment Strategy

In view of the anticipated increase in student population, the teachers in schools with surpluses will not be redistributed, focus will be placed on new recruitments to fill the identified gaps. However, qualified volunteers or ad-hoc staff engaged by the schools will be given the opportunity to be naturalized into the service. In addition, existing civil servants in the State or Secondary Education sub-sector who have the requisite academic and teaching qualifications will be permitted to apply for transfer into the BED teaching cadre for immediate redeployment. After mopping up all existing internal recruitment potentials, an external recruitment drive be launched for external (qualified) candidates to apply to fill the remaining gaps not filled by internal candidates.

The recruitment will be very competitive and open to all qualified candidates; however, a reasonable degree of allowance will be given to qualified female applicants and applicants with disability in line with the gender and social inclusion objectives of the State as set out by the State Executive Council.

3.2 Deployment Plan

3.2.1 Basic Education Teachers Deployment Plan by Classification of Duty Station

To effectively close the current and projected teacher gap between 2025 and 2029, Kebbi State should recruit and deploy teachers using a detailed and strategic framework. In 2025 recruitment, more teachers should be allocated/deployed to rural schools where the impact of shortages is most severe. This approach, presented in Table 6, will help bridge the educational disparities between urban and rural areas, ensuring that students in underserved regions receive quality education. As educational standards improve in these areas, it is anticipated that community support for basic education will grow, fostering smoother transitions from primary to secondary education.

Table 8: Basic Education Teachers Deployment Plan by Classification of Duty Station

Teachers Deployment by Classification of Duty Station	Total	2025	2026	2027	2028	2029
Rural	1,807	1,211	361	181	181	181
Urban	2,307	846	461	231	231	231

Source: Baseline Survey Analysis from Data Collected

A detailed breakdown of teachers' deployment to each basic education school in the state is presented in Annex 3 of this report.

3.2.2 Basic Education Teachers Deployment by LGA

Between 2025 and 2029, Kebbi State is poised to address the significant teacher shortages in its basic education system by strategically recruiting and deploying teachers. The deployment strategy will be based on an in-depth analysis of the existing teacher gaps across the Local Government Areas (LGAs). This will ensure that the allocation of teachers is aligned with the specific needs of each LGA, thereby optimizing educational outcomes. The detailed breakdown of the required teacher deployment per LGA over the next five years is presented in Table 7 below:

Table 9: Basic Education Teachers Deployment by LGA

Teachers Deployment by LGA	Total Staff	2025	2026	2027	2028	2029
Aliero Local Government Area	202	101	40	20	20	20

3.2.3 Teachers Deployment by Subject Taught

The proposed teacher deployment plan by subject area shown in Table 8 below has been carefully designed to ensure adequate and strategic deployment of teachers for core subjects especially Mathematics and English and subjects with the greatest teacher gaps. This will ensure that schools have

adequate teachers to cover all subjects irrespective of location. It will also contribute towards ensuring that students develop adequate literacy, numeracy, and other skills.

Table 10: Teachers Deployment by Subject Taught

Teachers Deployment by Subject Area	Total	2,025	2,026	2,027	2,028	2,029
Agric Science	361	181	72	36	36	36
Basic Science	156	78	31	16	16	16

3.2.4 Framework for Equitable Workers Deployment

To ensure equitable deployment of teachers, Kebbi State has prioritized underserved schools, communities, and LGAs. By allocating 67% of new teachers to rural areas in 2025, the initiative aims to address the significant teacher gaps and shortages that have hindered educational progress in these regions. This targeted approach not only bridges the disparity between urban and rural educational standards but also fosters community support for basic education, thereby enhancing transitions from primary to secondary schooling.

Furthermore, the recruitment process is designed to promote inclusion and diversity. Prioritizing the hiring of women, persons with disabilities, minorities, and other previously disadvantaged groups ensures a teaching workforce that reflects the diverse population it serves. This strategy is expected to yield better educational outcomes by leveraging the varied perspectives and experiences of a diverse teaching body, ultimately contributing to the holistic development of students.

3.2.4.1 Strategy for Sourcing and Recruiting New Teachers.

To effectively address the current gap in the teaching workforce, the following comprehensive strategies will be implemented:

Combination of Internal and External Recruitment.

- I. **Internal Recruitment:** Identify and promote qualified candidates from within the existing workforce to fill vacant teaching positions. This includes leveraging the skills and experience of current staff members who are capable of taking on new roles and responsibilities.

- II. **External Recruitment:** Conduct targeted recruitment campaigns to attract new talent from outside the organization. This will involve advertising job openings through various channels, including online job portals, social media, and professional networks, to reach a wider pool of potential candidates.

Upgrading Educational Institutions

- I. **Enhancement of Colleges of Education and Tertiary Institutions:** Invest in the infrastructure and resources of state colleges of education and other tertiary institutions to improve their capacity to train and produce high-quality teachers. This includes modernizing facilities, updating curricula, and providing professional development opportunities for faculty members.
- II. **Partnerships with Educational Institutions:** Establish partnerships with reputable educational institutions to create pathways for students to transition into teaching roles within the state. This can include internship programs, mentorship opportunities, and collaborative research projects.

Provision of Scholarships and Incentives

- I. **Scholarships for Aspiring Teachers:** Offer scholarships to students pursuing degrees in education to alleviate the financial burden and encourage more young people to enter the teaching profession. These scholarships can cover tuition fees, textbooks, and other educational expenses.
- II. **Incentives for Teaching in State-Owned Schools:** Provide additional incentives, such as signing bonuses, housing allowances, and transportation stipends, to attract and retain teachers in state-owned schools, particularly in underserved areas.

Improved Working Conditions and Allowances

- I. **Enhanced Working Conditions:** Improve the overall working environment for teachers by ensuring that schools are well-equipped with necessary teaching materials, technology, and support staff. This includes maintaining safe and conducive learning spaces for both teachers and students.
- II. **Rural Area Incentives:** Offer special allowances and incentives for teachers working in rural areas to compensate for the challenges associated with these locations. This can include higher salaries, rural hardship allowances, and opportunities for professional growth and development.

Support for Academic Advancement

- I. **Professional Development Programs:** Provide ongoing professional development opportunities for existing teachers to enhance their skills and

knowledge. This can include workshops, seminars, and online courses focused on the latest teaching methodologies and educational technologies.

- II. **Scholarships for Further Education:** Offer scholarships for teachers with secondary school certificates (SSCE) to pursue higher qualifications, such as the National Certificate in Education (NCE) or Grade II certification. This will help build a more qualified and competent teaching workforce.

Recruitment for Special Needs Education.

- I. **Specialized Recruitment Initiatives:** Implement targeted recruitment initiatives to hire teachers with expertise in special needs education. This includes identifying candidates with specialized training and experience in teaching students with disabilities and other special needs.
- II. **Training Programs for Special Needs Education:** Develop and offer training programs for current and prospective teachers to equip them with the skills and knowledge required to effectively support students with special needs. This can include certification courses, workshops, and hands-on training sessions.

By implementing these strategies, we aim to build a robust and capable teaching workforce that can meet the diverse educational needs of students across the state. This comprehensive approach will ensure that we attract, retain, and develop high-quality teachers who are committed to providing excellent education for all students.

3.3 Multi-Year Costed Basic Education Teachers Recruitment and Deployment Plan

3.3.1 Financing the Costed Recruitment and Deployment Plan

As presented in Table 9 below, Kebbi State will require about N1.14bn to finance its teacher recruitment and deployment plan for basic education in 2025, N456.70 in 2026, and N228.35 in 2027, 2028, and 2029, including training them and providing necessary allowances, instructional materials supply, and work tools/equipment to enable them to do their jobs effectively. To achieve this, a shift from heavy reliance on government and budgetary funding is necessary, moving towards partnerships and collaboration among various stakeholders and partners.

A proposed funding mix includes 60% from the government/budget, 25% from grants/donor funds, and 15% from private sectors and community participation. This strategy will incorporate partnerships with training institutions and leverage technology to reach teachers across the state. Enhancing non-government funding of basic education will involve attracting resources through partnerships, coordinating and synergizing with partner activities, and increasing private sector and community involvement in education, thus encouraging diversification of funding efforts.

This approach fosters shared responsibility and accountability in resource allocation and utilization. It emphasizes collaboration and partnerships among all basic education stakeholders, shared responsibility, community involvement in education, and democratic processes in the delivery of basic education. These practices have the potential to establish a solid foundation for achieving effective and sustainable education for all children, regardless of their physical, social, economic, or geographical circumstances.

Table 11: Multi-Year Costed Basic Education Teachers Recruitment and Deployment Plan

Cost Items	Description	Amount (N)				
		2025	2026	2027	2028	2029
Total Teachers to be recruited/Deployed		2057	823	411	411	411
Recruitment Exercise	<i>Adverts, examination, selection interview, etc.</i>	144,006,500.00	57,602,600.00	28,801,300.00	28,801,300.00	28,801,300.00
Onboarding Exercise	<i>Orientation and pre-deployment training.</i>	102,861,785.71	41,144,714.29	20,572,357.14	20,572,357.14	20,572,357.14
Personnel Cost	<i>Salary, allowances, incentives for rural posting, etc.</i>	174,865,035.71	69,946,014.29	34,973,007.14	34,973,007.14	34,973,007.14
Overhead Cost	<i>Off-the-job Training, instructional materials & stationery, etc.</i>	308,585,357.14	123,434,142.86	61,717,071.43	61,717,071.43	61,717,071.43
Capital Cost	<i>Office space, furniture, etc.</i>	246,868,285.71	98,747,314.29	49,373,657.14	49,373,657.14	49,373,657.14
Other Costs	<i>Contingency, etc.</i>	164,578,857.14	65,831,542.86	32,915,771.43	32,915,771.43	32,915,771.43
Total Cost		1,141,765,821.43	456,706,328.57	228,353,164.29	228,353,164.29	228,353,164.29

4.0 RECOMMENDATIONS

From the findings of this baseline exercise on the status of basic education in Kebbi State, a lot needs to be done toward defining a clear path for improving teaching and learning experiences and outcomes for all children. These pathways must involve all basic education stakeholders and be consistent with the multi-year teacher recruitment and deployment plan. Key recommendations include:

- Develop and sustain a system in which demand for qualified teachers is matched by a supply of well-trained and highly professional teaching force evenly distributed, and move from the system dominated by inexperienced, underqualified, and unskilled teachers unevenly deployed. A system with improved teacher management that promotes innovative approaches for attracting, developing, and retaining effective and motivated teachers.
- Implement policies to recruit and retain qualified teachers in underserved regions.
- Depart from the heavy reliance on government funding and financing of education to partnerships, funding, and collaboration with development partners/donors, the private sector, and the community.
- A shift from an elitist and discriminatory system that tends to perpetuate the existing social inequalities in society to a more egalitarian, inclusive, and equitable system that guarantees every child's right to basic education through well-funded and sustainable

access. Achieving greater inclusion and promoting diversity in basic education is a strong social justice imperative, an objective reflected in SDG 4 **“Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all.”**

- The transition from a weak data management system characterized by data whose reliability and accuracy cannot always be assured, to a strengthened EMIS that insists on the collection of accurate and reliable data for evidence-based decision-making and effective planning.
- A shift from institutionally weak implementation structures to improved and robust education intervention agencies to meet contemporary demands of basic education in Nigeria.
- Increase investment in primary and junior secondary educational infrastructure, especially in LGAs with fewer schools.
- Enhance monitoring and evaluation mechanisms to ensure equitable distribution of resources.
- Engage local communities to support educational initiatives and foster a culture of learning.

5.0 CONCLUSION

As Kebbi State embarks on this journey to addressing constraints in basic education under the HOPE-GOV Program, it is essential that it effectively leverages and maximizes this opportunity to transform its basic education and provide quality education for students in the state.

The transformation of basic education in Kebbi State hinges on a multifaceted approach that addresses critical constraints and optimizes available resources. One of these critical constraints is the quality and availability of teachers. By prioritizing teacher recruitment, deployment, and retention, high-impact programs, enhancing non-governmental funding, improving infrastructure, and bolstering the capacities of educators and managers, the state is poised to make significant strides in providing quality education. As this journey unfolds, it is crucial that all stakeholders remain committed to the vision of inclusive, equitable, and effective education for every child in Kebbi State. The success of these initiatives will be not only reflected in increased enrollment and improved learning outcomes but also in the broader development and empowerment of the state.
